

U.S. National Income and Product Accounts, 1966-69

THE complete set of national income and product tables for the 1966-69 period is presented on pages 17 to 49 of this issue of the Survey. As is the practice each July, estimates for the 3 most recent years have been revised. The estimates for 1966 and earlier periods have not been changed.

The revisions in the major aggregates—GNP, national income, and personal income—are minor, as can be seen from the accompanying table. Revisions in some of the components of the income and product flows—mainly "other labor income," corporate profits, personal consumption expenditures for goods, and State and local purchases—are somewhat larger, but the generalization that this July's revisions are unusually small applies.

The statistics published in this issue update the previous estimates for 1967-69 by incorporating a wide range of new and revised data from various Government agencies and private organizations. The most important of the new data are: Internal Revenue Service business tax return statistics, which are the basis for estimating business profits for 1967 and 1968; State unemployment insurance payroll statistics, which provide new information for the wage and salary estimates for 1969; new data from the Health, Education, and Welfare Department on contributions to health insurance in 1968, which enter into the computation of "other labor income"; 1967 Census of Manufactures data, which contribute to the estimation of producers' durable equipment; revised Census statistics on business inventories, which constitute the principal source of the estimates of the book value change in nonfarm business inventories for 1967-69; the Federal budget for fiscal year 1971 and other Government financial reports, which are used to update the Federal

Government components of the national accounts; and Census statistics on the finances of State governments for fiscal year 1969.

The quarterly estimates incorporate, in addition to the revised or newly available source data, and updating of seasonal adjustments.

In the standard methodology used in the estimation of a number of goods components of consumer purchases, Census data on retail trade are heavily relied upon as extrapolators of the benchmark estimates which are derived by the commodity flow method. Because of problems resulting from a change in the retail sample design in 1968 and 1969, Census data on manufacturers' shipments of consumer-type goods were used instead to produce the 1968 and 1969 figures shown in this report. The retail trade data continued to be used as interpolators, to obtain the quarterly figures.

Back data

Table numbers and titles in this report are the same as in prior July

Surveys and in the SURVEY Supplement, *The National Income and Product Accounts of the United States, 1929-1965, Statistical Tables*. Summary historical tables are provided on page 50. Components for GNP, national income, and personal income, 1929-69. For all of the tables shown in this report, data for 1964 and 1965 appear in the July 1968 Survey. Data for years prior to 1964 appear in *The National Income and Product Accounts of the United States, 1929-1965*, except for the following: Gross corporate product (table 1.14), gross product by industry (tables 1.21 and 1.22), quarterly per capita disposable personal income (addenda in table 2.1), and quarterly implicit price deflators for GNP by sector (table 8.4). The historical data for these series may be found in the following issues of the SURVEY: Gross corporate product—May 1967, gross product by industry—April 1967, quarterly per capita disposable personal income—September 1967, and quarterly implicit price deflators for GNP by sector—September 1967.

THE NATIONAL INCOME AND PRODUCT ACCOUNTS - 1969

Relation of the Four Major Measures of Production and Income Flows

- GROSS NATIONAL PRODUCT is the market value of the output of goods and services produced by the Nation's economy
- NATIONAL INCOME is the total earnings of labor and property from the production of goods and services
- PERSONAL INCOME is the total income received by persons from all sources
- DISPOSABLE PERSONAL INCOME is the income remaining to persons after payment of personal taxes

1. The gross auto product total includes government purchases, which amounted to \$14 billion annually during the periods shown.

2. Differs from the gross auto product total by the markup on both used cars and foreign cars.

Table 1.17.—Gross Farm Product

[Millions of dollars]

	1966	1967	1968	1969
Total value of farm output.....	46,593	46,676	47,694	51,178
Cash receipts from farm marketing and CCC loans.....	43,373	43,615	44,228	47,181
Farm products consumed directly in farm households.....	817	745	732	740
Change in farm inventories.....	-158	737	68	412
Gross rental value of farm homes.....	2,352	2,481	2,520	2,528
Less: Value of intermediate products consumed, total.....	21,298	21,637	21,977	22,278
Intermediate products consumed, other than rents.....	19,184	19,728	19,813	21,138
Gross rents paid to nonfarm landlords (excluding operating expenses).....	2,122	2,068	2,185	2,242
Plus: Other items.....	-184	-203	-223	-279
Equals: Gross farm product.....	24,592	24,559	25,489	27,421
Less: Capital consumption allowances.....	4,963	5,900	6,925	8,249
Indirect business taxes.....	1,729	1,860	2,049	2,224
Plus: Government payments to farm landlords.....	2,984	2,782	2,110	3,414
Equals: National income originating in farming.....	21,633	20,864	20,731	22,042

Table 1.18.—Gross Farm Product in Constant Dollars

[Billions of 1966 dollars]

	1966	1967	1968	1969
Total value of farm output.....	42.9	45.1	45.1	45.7

Note.—Employee compensation includes wages, salaries, and supplements. Net interest is the net interest component of indirect business. Capital consumption allowances consist of depreciation and noncapital damage to fixed business property. Indirect business taxes include indirect business tax and nontax liability and business transfer payments. Profit-type income consists of corporate profits after inventory valuation adjustment, proprietors' income, rental income of persons, and surplus of government enterprises less subsidies. Capital consumption allowances and profits by industry may differ from figures published in other tables because these two items have been reallocated by industry from a company to its establishment basis.

*Less than \$50 million.
